YATA SHIVASAI

9392430311 | yatashivasai50@gmail.com | Hyderabad, Telangana, India

PROFESSIONAL PROFILE

Final-year B.Tech Electronics and Communication Engineering student at NNRG with hands-on interests in cybersecurity, SOC operations, threat detection, and web security testing. Experience building security-focused projects and practicing in CTF environments, with recognition at an IIT hackathon and certifications in networking and cybersecurity. Interested in applying analytical troubleshooting, scripting, and security fundamentals to real-world defensive security work.

EDUCATION

B.Tech — Electronics and Communication Engineering | Expected 2027

Nalla Narasimha Reddy Education Society's Group of Institutions (NNRG)

Diploma — Electronics and Communication Engineering | 92%

CJITS, Jangaon

SSC | 100%

Maharshi Vidya Mandir High School

TECHNICAL SKILLS

Cybersecurity: SOC fundamentals, web security testing, intrusion detection concepts, CTF practice, incident investigation fundamentals

Tools & Platforms: Wazuh (project learning), Ubuntu/Linux, Windows, Burp Suite, Nmap, Wireshark, Hack The Box

Programming & Scripting: Python, Bash, HTML/CSS/JavaScript fundamentals

Networking: TCP/IP, DNS, HTTP/HTTPS, network troubleshooting, CCNA-level networking

Hardware / Embedded: ESP32, OLED displays, Arduino IDE, embedded-system prototyping

PROJECTS

Local Website Intrusion Detection System | *Cybersecurity project*

- Designed as a security-focused project to identify suspicious activity targeting a local website.
- Focus areas include monitoring web requests and identifying potentially malicious patterns; implementation specifics can be added once finalized.

Portable ESP32-Based Cybersecurity Device (KSHETR) | *Embedded systems + cybersecurity*

- Prototyping a portable ESP32-based device with an OLED menu and modular hardware.
- Explores defensive wireless analysis and embedded-device interfaces in controlled, authorized lab environments.

AI-Assisted SOC: Threat Detection & Incident Response | *Learning / portfolio project*

- Planned lab workflow using Wazuh, Windows Sysmon, Ubuntu, Python alert enrichment, and MITRE ATT&CK; mapping.
- Intended detections include repeated SSH failures, suspicious PowerShell activity, and file-integrity changes.

CERTIFICATIONS

- Cisco CCNA
- EC-Council Certified Cybersecurity Technician (CCT)
- Python Certified Entry-Level Programmer (PCEP)

ACHIEVEMENTS

- 3rd Prize — IIT Hackathon, 2025
- Ranked 27th in a Hack The Box (HTB) CTF
